Shipping Address:

The Worth Company
214 Sherman Ave.
Stevens Point, WI 54481
USA

The Worth Company
is proud to be certified to
the ISO 9001:2015 standard
for manufacturing.

Table of Contents

BEADS

Fluorescent Plastic Beads.....	101-103
Hollow Metal Beads	100
Solid Brass Beads.....	99

CLAMSHELLS	113-114
-------------------------	---------

CLEVISES

Clip-N-Spin Clevis	91
Double Clevis	92
Easy-Spin Clevises	88
Folded Clevises.....	90
Strip Clevis	89

CUSTOM COLORS & PAINT	115-119
--	---------

CUSTOM MANUFACTURING	120-121
-----------------------------------	---------

LURE BODIES	97-98
--------------------------	-------

SPINNERBLADES

Buzzer Blades	84-85
Colorado	25-29
Colorado - Aspen	33-37
Colorado - Aspen - Steel	38
Colorado - Aspen - Deep Cup	39-41
Colorado - Badger	30
Colorado - Steel	31-32
Fluted Blades	57-58
French Blades	53-56
Ice Blades.....	42
Indiana	43-47
Indiana - Badger	48
Indiana - Steel	49-50
Inline Blades	21-22
June Bug Blades.....	23
Magnum Blades	51-52
Olympic Blades.....	79-83
Propeller Blades	86
Ripple Blades	24
Roto Blades.....	20
Swing Blades.....	77-78
TurboProp Blades.....	87
Whiptail Blades	75-76
Willowleaf	59-63
Willowleaf - Aspen.....	67-69
Willowleaf - Aspen Steel.....	70
Willowleaf Shallow Cup	71-72
Willowleaf Serrated Blades.....	73-74
Willowleaf - Steel	65-66

SPLIT RINGS

Fine Gauge Split Rings	7-8
Heavyweight Split Rings	4
Oval Rings	3
Split Ring Qualities	2
Standard Gauge Split Rings	5-6

SPOONS

Casting Spoons Brass	11-14
Casting Spoons Steel	9-10
Trolling Spoons	15-18

SWIVELS

Ball Bearing Swivels	94
Barrel Swivels.....	95

TERMS & INFORMATION	122

TOOLS

Fly Tying Vise	111
Industrial Wire Former	109
Split Ring Pliers	112
Wire Forming Tool.....	110

WIRE FORMS & MISC

Coil Spring Fasteners	105
Disc Washers	93
Figure 8 Hook Hangers	104
Red Flipper	96
Straight Wire Shafts	106
Trolling Rig Rudder	19
Wire Shafts Type A	107
Wire Shafts Type B	108

Split Ring Qualities

Which Split Ring is the Right Ring for You?

We have devised two charts that help answer some important questions when you are deciding on which split ring will be perfect for you.

Chart A

Allows you to choose a ring based on the feature most important to your application.

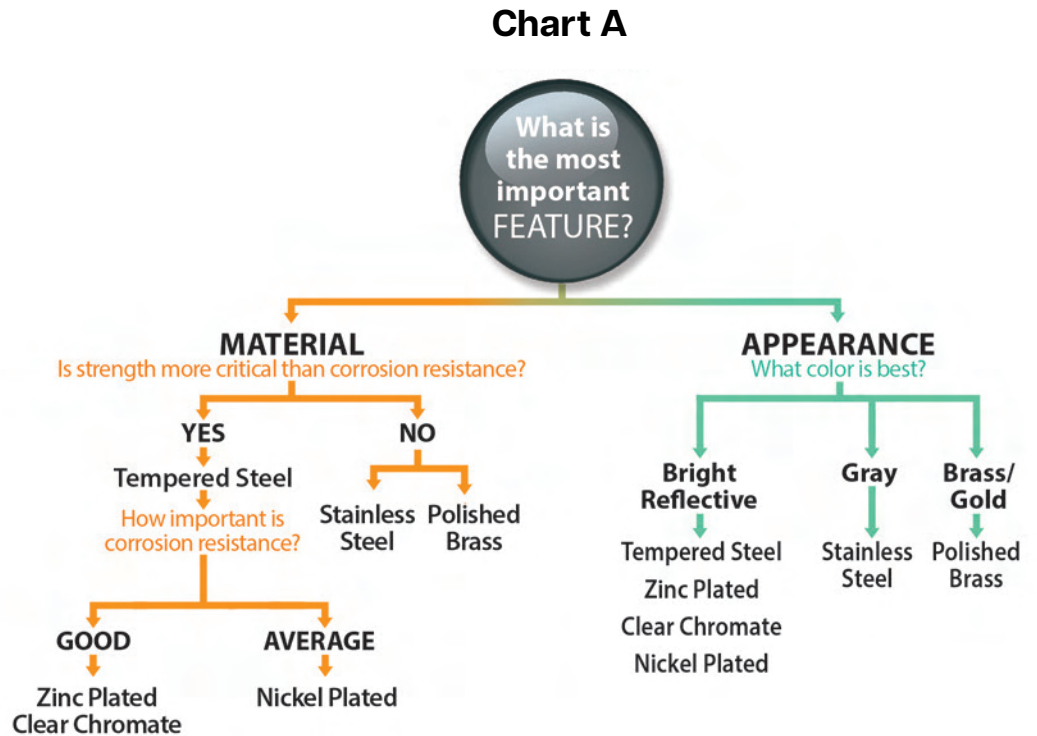

Chart B

Gives you more detailed information about materials, their finishes and availability.

If you have any questions about our finishes, standard or custom, or specific proper ties of the materials we use in our split rings, please call. Our staff knows split rings and will be happy to assist you in choosing the right split ring for you.

Chart B

Tempered Steel

Standard Finishes	Availability	Appearance	Corrosion Resistance	Strength/Memory
Plain Polished				
Nickel Plated	X	Bright Reflective	Average	Very High
Clear Chromate over Zinc	X	Bright/Blue Hue	Moderate High	Very High

Stainless Steel

Standard Finishes	Availability	Appearance	Corrosion Resistance	Strength/Memory
Plain Polished	X	Bright Gray	Very High	Average
Nickel Plated				
Clear Chromate over Zinc				

Brass

Standard Finishes	Availability	Appearance	Corrosion Resistance	Strength/Memory
Plain Polished	X	Gold	Very High	Marginal
Nickel Plated	X	Bright Reflective	Very High	Marginal
Clear Chromate over Zinc				

Split Rings - Oval

- 50% stronger than similar fine sized round split rings.
- Self-centering to keep the "cutoff" at the side.
- High quality materials
- Superior zinc plating for corrosion protection.

Oval Split Rings

Size	5	6	7	8
Length	.315 in / 8 mm	.394 in / 10 mm	.433 in / 11 mm	.472 in / 12 mm

Split Rings - Heavy

O.D. Tolerances:
Steel and Stainless Steel + .015" - .005"

- Made for high strength applications
- Made from heavy gauge spring tempered steel & stainless steel
- Ideal for large game fish such as musky and pike
- Stainless steel recommended for saltwater applications

Heavy Weight Split Rings

Size	4	5	6	7

Split Rings - Standard

O.D. Tolerances:
 Steel and Stainless Steel + .015" - .005"
 Brass + .025" - .005"

- Made in the USA
- The standard in the fishing tackle industry
- Unmatched quality
- Used in aerospace, automotive, and defense industries.

Swivel - Ball Bearing

Size 2

Approximate Size

Large Eye Swivels

After years of design, engineering development and the production of millions and millions of swivels the Worth Ball Bearing Swivel continues to set the standard in the tackle industry among OEM fishing tackle manufacturers. Our swivels feature highly polished, precision stainless steel ball bearings, in conjunction with tapered bearing surfaces that combine for a smooth, almost effortless spinning action.

The sleek outer case and ribbed inner jacket design will give our Worth Ball Bearing Swivel the strength and durability you need for all spinnerbait applications. In addition, the special stem design reduces friction and lock-up. We suggest attaching our #2.5 fine nickel split ring. This ring was especially designed to accommodate this ball bearing swivel for perfect balance and performance.

Industrial Wire Former

The Worth Industrial Wire Former is a commercial grade wire forming tool designed for the demanding requirements of the intermediate sized fishing lure manufacturer.

The wire former allows for great flexibility in creating a variety of wire shaft configurations such as end-eyelets, spring-lock shafts, buzz-bait forms, spinnerbait forms, jig spinners, center-shaft twists, and a variety of specialized kinks and bends. It provides for both wire bending and wire wrapping. The bending fixture features an adjustable wire stop and locator, adjustable base pin, and two rotating bending pins.

The wire wrapping fixture utilizes a positive wire-clamp feature and a rotating adjustable wrapping shaft. Both fixtures are positioned to allow the inclusion of lure components onto the wire shaft or eyelet being formed. All wear points are constructed of hardened tool steel for long life. Both rotating shafts are fitted with bronze bearings to reduce friction and wear.

The unit is constructed of machined aluminum. All forming pins and points are replaceable. The Wire Former is designed to be mounted or clamped to a workbench. Each unit includes pins and fixtures for the indicated range of wire diameters. Additional fixtures are available separately.

Weight Each: 2.45 lbs.

* Custom options available. Our wire former can be modified to suit most specialized needs. Contact our Sales team to learn more.

Fly Tying Vise

We offer this economical high-quality vise with the hobbyist in mind. This is the ideal vise for fly tying kits, fly tying classes, and quantity users who require a good but inexpensive vise. The jaw projects 4 1/2" from the table top giving ample room for winding hackle or thread. The sturdy 'C' clamp will accommodate tables up to 1 3/8" thick and mounts solidly. This vise has no rivets to break or cause repairs, and is carefully stamped from high-quality steel. Nickel-plated for rust resistance.

Quantity Discounts:

100 less 5%, 1000 less 10%

★ ★ ★ ★ ★
ASSEMBLY TIP
Keep Your Split Ring's Memory!

Proper split ring assembly is imperative, so don't compromise the memory. To accomplish this, keep the ring and the blade on the same plane as much as possible. Insert the blade between the two coils and spin the ring onto the blade, lifting the ring (changing the angle) only enough to aid the assembly. Always try and assemble the blade where the least distance is achieved between the hole and the edge of the blade.

WARNING: This product can expose you to chemicals including nickel and lead, which are known to the State of California to cause cancer and birth defects or other reproductive harm. For more information, visit www.P65Warnings.ca.gov

Clamshells

Worth clamshells will accommodate most packaging needs for spoons, lures, or part applications. These are clear virgin PVC enclosures with a bottom hinge and snap closure. Packages can also be taped or stapled for extra security. Their transparency offers excellent product visibility for faster customer recognition.

Custom Colors

Surface Finishes

As the leading lure components manufacturer in the world, we know that in order for you to be successful, your products must first catch your customer's eye before they catch any fish.

The Worth Company offers a wide range of best in class surface finishes including Bright Nickel & Zinc electroplate, Polished Brass & Stainless Steel, as well as a full line of Painted and Printed finishes.

We also realize that having a unique product separates you from your competitors. That's why rather than

offering common off-the-shelf stock painted patterns, we offer a full line of world-class finishes that are extremely durable and allow us to create any pattern and color combination under the sun.

By combining finishes we are able to create products that are truly unique to each customer while always meeting the high standards you expect from The Worth Company. By choosing The Worth Company for all your surface finishing needs, you'll catch exactly what you want, customers.

Infinite Enamel Colors

At The Worth Company we won't limit you to a handful of color choices. From the brightest white to the deepest black and every hue in between, whatever your project requires, we can match it!

Endless combinations and treatments are possible with our glossy enamel colors.

Infinite Metallic Colors

Metallics give you the sheen and reflectiveness of nickel with the added appeal of color. We can turn almost any color into a metallic color. As with all of our paints, metallic colors work well when combined with additional artwork or a logo.

Feel free to use your imagination when it comes to metallics. It doesn't have to be a single color.

We can even simulate the look of copper, brass or black nickel on our nickeled blades.

WARNING: This product can expose you to chemicals including nickel and lead, which are known to the State of California to cause cancer and birth defects or other reproductive harm. For more information, visit www.P65Warnings.ca.gov

sales@worthco.com

Fluorescent Colors

Our fluorescent colors are pigment based paints with intense bright hues. Blades may be painted with a single color, a combination of colors, or with additional artwork added such as a company logo.

Fluorescent Orange

Fluorescent Green

Fluorescent Blue

Logo added to a Fluorescent Orange blade.

Chartreuse

Fluorescent Red

Fluorescent Pink

Graphic added to a Fluorescent 3-color fade.

Pearl

A sparkly white color. While beautiful alone Pearl also works extremely well when used as a base underneath additional artwork or a logo.

Pearl

Photographic image added to a Pearl blade.

Color and a graphic added to a Pearl blade.

UV Magic Clear Coat - *Now UV it, now U-Don't*

Science has confirmed what many anglers have known for years. Fish recognize and are attracted to Ultraviolet light. UV Magic Clear Coat is an ultra-durable, specially designed coating that reflects more UV light than ever before, causing lures to be even more irresistible to fish while working to boost anglers catch rates.

By combining traditional painting and advanced printing techniques with the most reflective UV coating available, we are able to produce designs that are completely unique and sure to catch your customer's eye.

WARNING: This product can expose you to chemicals including nickel and lead, which are known to the State of California to cause cancer and birth defects or other reproductive harm. For more information, visit www.P65Warnings.ca.gov

sales@worthco.com

Glow Colors

We are excited to offer a line of brilliantly glowing and durable glow paints. Our line of Nova Glow paint is the brightest and longest lasting glow paint in the industry. While our line of Cool Glow offers a wide range of colors with intense glowing characteristics to meet all your application needs. As with all of our paints, glow paints work well when combined with additional artwork or a logo.

Stock Fish Patterns

Our finishing catalog wouldn't be complete without a best-in-class line of photo realistic bait fish patterns. These popular bait fish are sure to be mistaken for the real thing. Combined with our durable gloss finish, you'll be sure to catch customers and fish alike.

WARNING: This product can expose you to chemicals including nickel and lead, which are known to the State of California to cause cancer and birth defects or other reproductive harm. For more information, visit www.P65Warnings.ca.gov

Real Feel™

We are extremely proud to offer our **Real Feel™** blades and spoons. This technology gives us the ability to add amazing raised textures, patterns and designs to our high quality lure components. You have to feel it!

Add a scale pattern to a fish image.

Enhance a design or a logo.

Combine embossing with Fluorescent or Glow Colors.

Create a metal-stamped look on a polished blade.

Graphic Enhancement

With our high tech digital system you are no longer limited to one-color logos or simple graphics. Bring us your ideas and we will help bring them to life!

Company logos and custom designs are a breeze!

Photographic images are printed with amazing detail and true to life colors.

Two-sided colors and designs are not a problem.

Glitter

We also offer the option to add a glitter to nearly any color or color combinations, which is sure to catch both fish and attention. Shown here combined with black enamel and white enamel paint.

Polishing & Electroplating

The Worth Company has offered polished and plated components for over 75 years. A variety of corrosion resistant finishes are offered including the following...

Polished Brass

Polished Brass
Lacquered

Nickel

Gold

Custom Manufacturing

*Our fully equipped
factory in
Stevens Point, WI.*

It's easier and more affordable than you might think!

For over 70 years The Worth Company has been manufacturing Fishing Tackle Component parts. We have state-of-the-art equipment to help produce your product quickly and more efficiently. If you need help with a special design, heavier split ring, or an unusual wire form, we have a full-time lure component designer who can bring your custom parts to life.

Need dies for your special blade? Tooling for a wire form or split ring? We have an in-house, fully-staffed tool department that can make all the necessary tooling requirements for your part. All tooling is made in house here in Stevens Point, WI. We have done this so that when the tooling is completed it can be thoroughly tested in the press or 4-slide that it will be run on. With the tooling made in house, we know that it is being done correctly.

If you have been thinking about making that special part, either send us a drawing with dimensions or a sample part. After reviewing the item, if we have any questions, we will contact you before quoting. We all know it's better to have everything correct the first time and our goal is to surpass your expectations.

Need a special bend or twist on your wire form?

We have many different machines that can do this for you. Our equipment is able to handle many different types of material, like brass, steel or stainless steel and virtually any wire diameter.

We understand the complexities and requirements necessary to create wire forms to your exact requirements. Minimums can run from 5,000 to 25,000 parts depending on the machine that is being used. If these minimums are too high, please take a look at our Industrial Wire Former on page 105. This enables you to do all types of bends and twists in smaller quantities. If you send us your part, we will test it on the machine to make sure it comes out exactly as you want.

For custom made parts, please send us either a sample or drawing with dimensions and we will prepare a quote for you.

Custom Manufacturing

Looking for something special?

How could anyone require a split ring different from the hundreds we already offer? Easy. You may want a different shape, such as oval rather than round, or you might need a different wire diameter, outside diameter, or inside diameter.

We have an in-house Tool and Wire Department, so that for your special project we can usually have pre-production samples within 1 to 1-1/2 weeks.

We offer different types of material like brass, steel and stainless steel. We offer nickel and zinc plating in house.

To get a quote, please send us a sample or drawing with dimensions.

Remember, the split ring has a very important role with your lure and you should always demand the best.

Custom Blade Stamping

Custom dies and stamps can be made for many different items. We can create imprint stamps to put your name, logo or design into the blade, or perhaps you like our Colorado or Willowleaf blades with a little different shape or cup. There's nothing out of the question.

If your shape is so completely different than anything we have, we can quote you on making a completely new die for your part.

Since we have an in-house Tool Department, we are able to get your die done in a timely manner. Parts are then tested and we will send you pre-production samples to make sure they meet your expectations. Once we start running the product, there are many checks that the part goes through before they are shipped to you. This way we make sure that you are receiving exactly what you requested.

With our state-of-the-art machinery and qualified staff, we are capable of making your unique part. All products are confidential and cannot be sold to anyone else without your permission.

If you have that unique part, please send us a drawing with dimensions or a sample and we will prepare a quote for you. It's affordable and can really make your lures distinctive.

Terms & Information

TERMS: Net 30 days to all pre-approved accounts. Shipments are made F.O.B. Stevens Point, WI unless otherwise specified by the customer. Master Card, Discover, and VISA are also accepted for credit card payment. No past due customers will be shipped merchandise. Accounts are payable in U.S. funds only.

PRICES: Prices are subject to change without notice.

QUANTITY DISCOUNTS: Quantity discounts are allowed for each individual product, size and finish. No combination or further discounts are available.

FEDERAL EXCISE TAX: Federal Excise Tax applies to articles of sport fishing equipment that are designed or constructed for the use in the sport of fishing. Therefore, component items purchased from The Worth Company are subject to a 10% Federal Excise Tax. The manufacturer, producer or importer pays this tax. Exemption from this tax requires the customer to have an approved I.R.S. Form #637 on file with The Worth Company. This form can be obtained from your local I.R.S. office. The Federal Excise Tax paid by the manufacturers on the sale of sport fishing equipment goes directly into a fund dedicated specifically for projects to improve fishery habitat, fishery access and aquatic education. In addition, the funds have supported state fish hatchery and stocking programs, education efforts, weed control and habitat improvement projects and fishery research.

SALES & USE TAX: State Tax may be applicable based on the Nexus State orders are shipped to.

SAMPLES: Samples are available to qualified manufacturers upon request. For larger sample orders, there will be a fee of \$15 to \$25 plus freight. We will advise you of the fee when you place your request for samples. Please contact The Worth Company for sample request orders.

RETURNED GOODS: A minimum restocking charge of 10% will be made on any goods returned in their original condition. No returns are allowed on specials, painted items, polish brass lacquered items or gold products which are not regularly cataloged by us. No returns will be accepted without prior approval. Returns will not be accepted after 60 days from the invoice date.

EQUIPMENT PURCHASES: Equipment will require 100% pre-payment before any product can be shipped.

HANDLING CHARGE: For orders less than \$10, there is a \$2 handling charge.

MINIMUM ORDER QUANTITIES: All component products listed in our catalog have a Minimum Order Quantity of 100-pcs. Each line item under 100-pcs will be charged an additional small order fee of \$5.00. If your order total is \$100.00 or more when ordering less than the Minimum Order Quantity, the small order fee of \$5.00 per line item will be waived.

INSURED PACKAGES: All USPS packages are insured if the value is over \$100. All USPS Foreign/Canada shipments are insured regardless of their value. UPS Ground/Residential are insured if the value is \$500 or more. UPS Collect shipments are always insured. All Foreign/Canada shipments are insured regardless of their value.

SPECIAL ORDERS: Products of special design will require 100% pre-payment on all custom tooling charges, along with a signed purchase order. All quotations and tooling agreements must be signed and on file before a custom order can be implemented. A \$100 deposit is required on all custom components unless otherwise approved by Worth Management. Standard variance for special orders is +/- 10% of the original order quantity. Overages or shortages on orders requiring special material will be reviewed on an individual basis. All quotations, tooling agreements and deposit money must be signed and on file before any projects begin. The delivery time frame listed on each quotation will begin with the receipt of this documentation and all required deposit money. When applicable, any initial specification sheet submitted to the customer must be approved, signed and returned in order for the project to proceed. The Worth Company will cover the cost of the initial set-up and pre-production samples, subject to the required minimum quantities. This will include all metal component parts and wire forms. A response must be made within 24 hours from the receipt of the samples. Any delays beyond that 24-hour period will result in project delays and additional costs for rescheduling and 2nd set-up of the project tooling. The customer will be responsible for any "Next Day Air" charges if requested.

PATENTS: When placing an order for goods appearing within, the purchaser warrants that the finished article is not and will not be an infringement of any valid patents or trademarks, and the purchaser further agrees, at his own expense, to defend any and all actions and suits which may be brought against the company charging such infringement.

PACKAGING: All items contained within are shipped in bulk. Items are counted by weight and are guaranteed accurate within +/- 2%. Special quantity packaging is available for an additional cost, contact The Worth Company to get a quote.
